

**Giving mixed
recycling new life.**

All your recycling needs met, in one container.

With increasing landfill tax, can you afford not to look at your recycling options?

Our mixed recycling collection service is a simple and efficient way for you to dispose of your recyclables. There are so many variations available for mixed recycling services. Whether you produce a lot of waste paper, bottles, tins, plastics or a combination, as a leading recycler, Viridor is perfectly placed to find the solution that is just right for you.

We are investing in the latest recycling technologies, allowing for a wider range of products to be recycled, making us super-efficient, so we can always meet your needs.

We collect mixed recycling from organisations of all sizes across the UK, with our own dedicated collections fleet. Our tracked vehicles and highly trained staff deliver a reliable and effective solution.

What's in it for you?

As well as the feel-good factor of knowing your organisation is playing its part in reducing environmental impact, recycling also helps you:

- Drive down costs and hassle with a single waste management provider
- Meet or exceed your sustainability targets
- Enhance your green credentials: customers and prospects are looking to work with organisations who are ethical and sustainable
- Peace of mind: by working with a compliant, trustworthy provider
- Reduce the size and weight of your general waste bin by separating your waste and recycling
- Generate revenue: by partnering with Viridor you could also be entitled to a rebate, turning the waste at the bottom of the bin, into ££s on your bottom line

Investing in mixed recycling

We invest in state-of-the-art recycling facilities. Our Materials Recycling Facilities (MRFs) are some of the biggest and most advanced of their kind in Europe.

Our MRFs across the UK use a combination of advanced mechanical sorting and manual quality control to separate materials into individual streams, ready to be put back to work.

Our technology investments allow us to offer detailed analysis and reporting, with compliance being key. All material exports are fully compliant, ensuring you are never at risk of breaching environmental regulations.

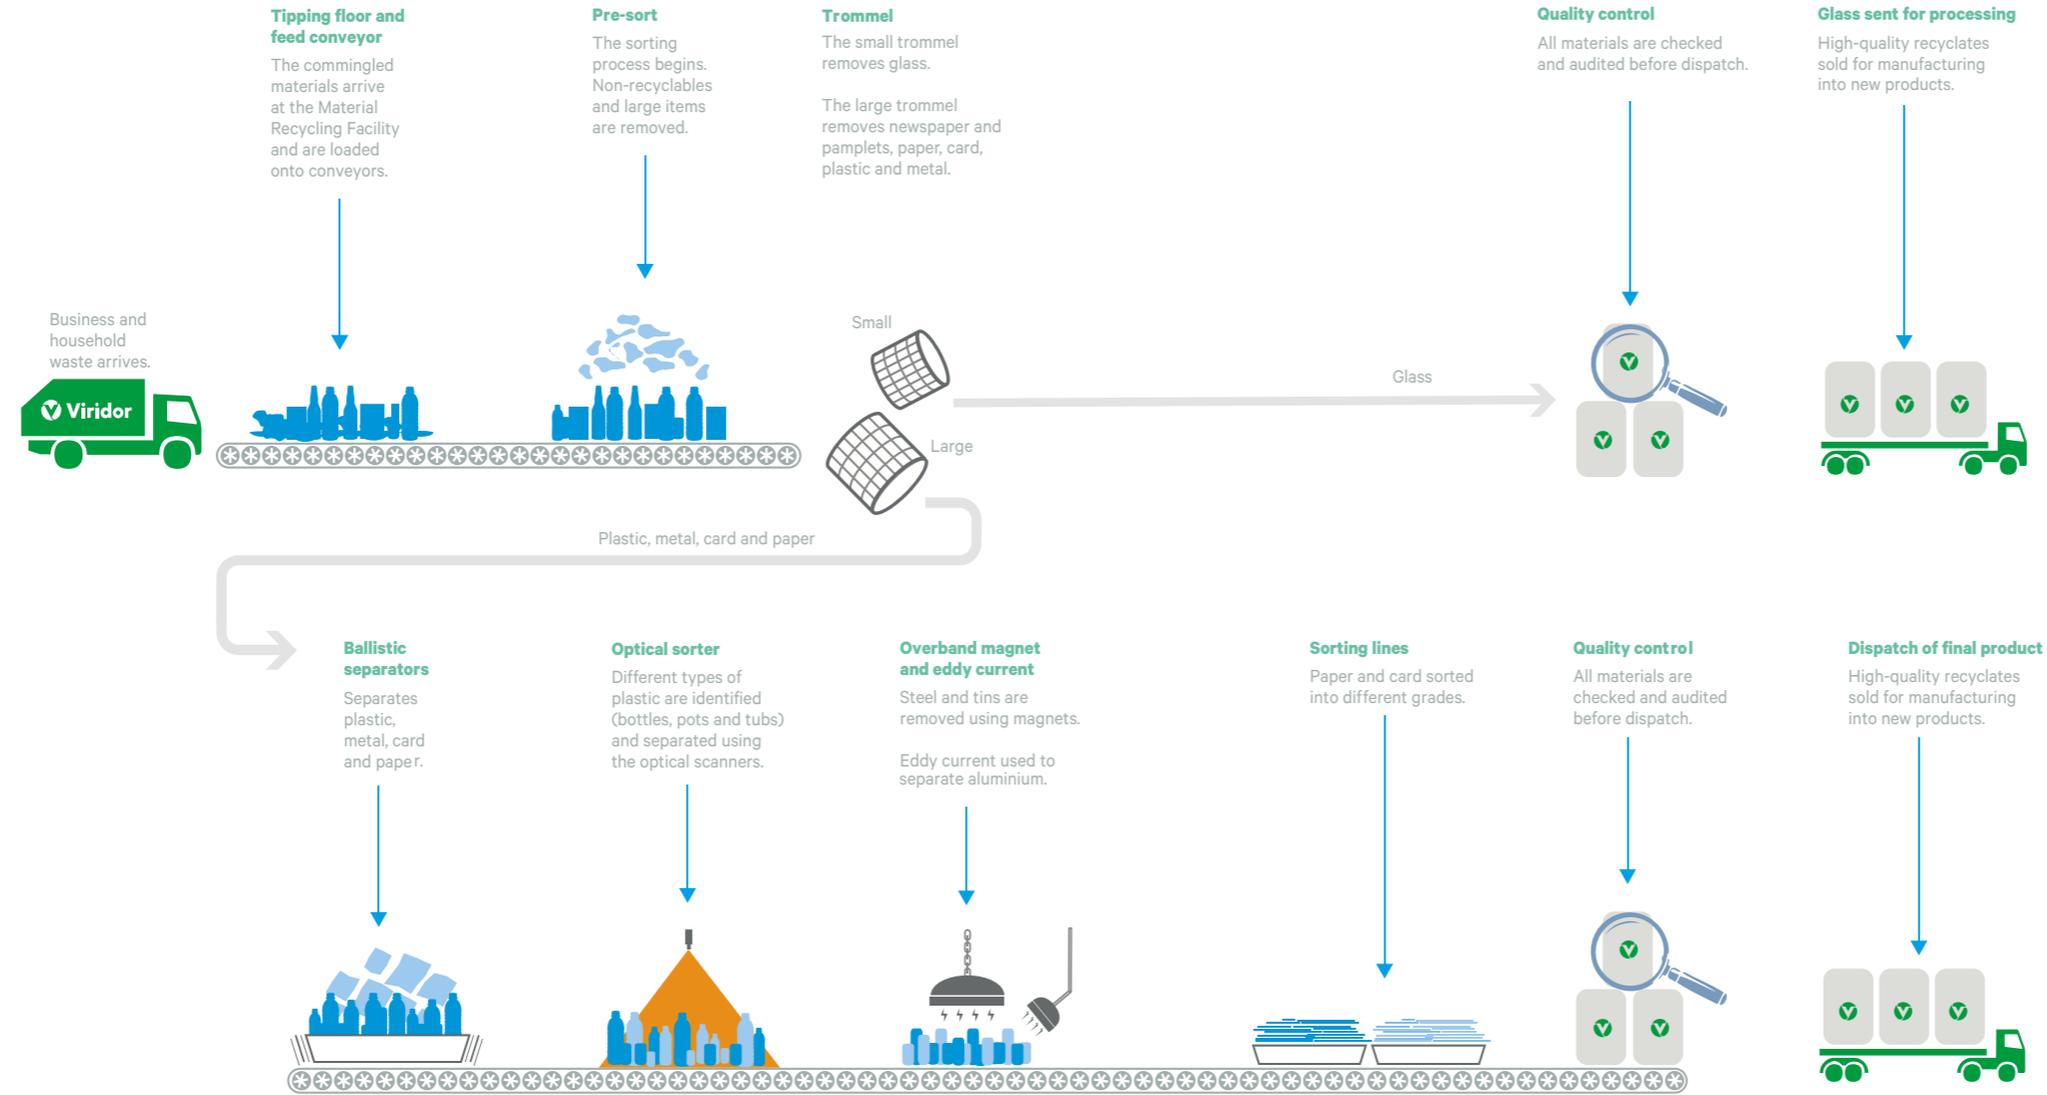

A trusted advisor

We are constantly looking at ways to help our customers increase their recycling rates.

Partner with Viridor and you partner with a true expert in recycling. If required, we can make you experts too. We can offer training and educational resources to help your organisation turn more of your recyclable waste into brand new products, reducing everyone's environmental impact.
